

# Suction Cup Quick Fitting Guide

Follow the steps to fit your Bathwater Barrier Replacement Suction Cups. Your pack contains two suction cups with two pins each. If you require further assistance please contact our Customer Service Team Monday to Friday 10am - 4pm:

☎ 01579 208200

✉ info@babydam.com

1 Remove your original suction cups, using force to break the holding pin.

2 Position the new suction cup over the housing with the pull tab facing downwards.

3 Push the new suction cup onto the housing ensuring that the holes match up.

4 Push the longest pin through the hole from either side as far as it will go.

5 Push the smaller pin onto the protruding end of the long pin and push both ends together as firmly as possible.

6 Pull the pull tab through the hole in the housing until the two ribs are visible.

Repeat the process with the other Suction Cup and your Bathwater Barrier will be as good as new!

**WARNING:** These contain small parts which can present a choking hazard to babies and small children. Always replace your suction cups away from babies and children and always ensure that once replaced you check they are secure prior to every use.
